

Tsudakoma Information

“2,105 rpm” - Tsudakoma set the record for the highest
RPM speed in air jet loom history

Report on ITMA 2015

Tsudakoma exhibited a concept model air jet loom for the next generation at ITMA International Textile Machinery Exhibition 2015 in Milan from Nov. 12, 2015 to Nov 19, 2015. It set the record-high rpm of a continuous 2,105 picks per minute.

The outstanding feature of jet looms is high productivity with high speeds and stability while weaving quality fabric.

We exhibited a concept model that implemented the latest technology for the “Fastest jet loom in the world.” Visitors from all over the world were surprised and excited by our world record.

The new air jet loom ZAX9200i MASTER also demonstrated Jacquard weaving of classy curtain at 850 rpm high speed. It received acclaim with its high speed and massive energy saving ability.

We forge ahead with developing the world’s best jet looms.

Demonstration by the concept model received high praise from many professional visitors

High-grade curtain with a complicated design was woven at 850 rpm.
