Exhibition at ITMA ASIA + CITME 2020

Smart Ecology ~ Ecology and Economy in Harmony ~

TSUDAKOMA Corp. will exhibit at ITMA ASIA 2020 to be held from 12 to 16 June 2021 in Shanghai, China.
(Stand No.: Hall 3, C32)

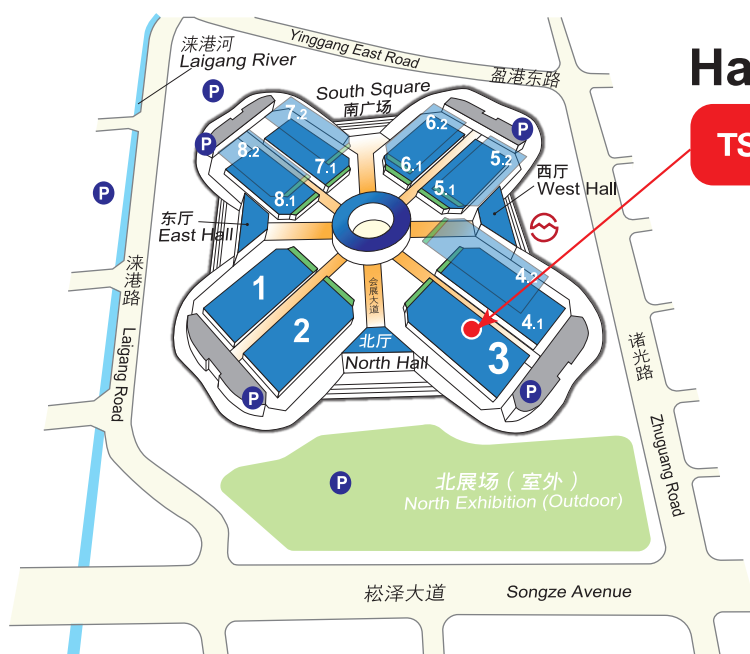

In pursuit of today's theme: energy savings, and environmental impact reduction, TSUDAKOMA developed the next-generation air jet loom, ZAX001neo, achieving high productivity and high quality.

The ZW8200 water jet loom is new with the enhanced productivity and environmental performance of the best-selling ZW8100.

The Chinese-made, TSUDAKOMA-branded ZW508 water jet loom was upgraded, ensuring more accessibility and user convenience.

Toward realization of a sustainable world and supporting the future of the textile industry.
TSUDAKOMA continues to seek and integrate everything possible into our machines for our customers.

Unfortunately, our actual machines can't be seen at the venue.
Instead, we will introduce the features of our products through images and panel display.
TSUDAKOMA's staff are looking forward to your visit.
