

Dear customer;

October, 2021

“EMO Milano 2021”

We are pleased to inform you that Tsudakoma will join in “**EMO Milano 2021**” which will be held in Milano, Italy from 4th to 9st of October, 2021.

By showing three categories of drive mechanism of NC rotary table, “**BD (Ball Drive)**”, “**DD (Direct Drive)**” and “**WD (Worm Drive)**”, we bring you to the next stage of smart production trend.

We will also be exhibiting for the first time an “**IoT- enabled Rotary Table**” with notification of preventive maintenance.

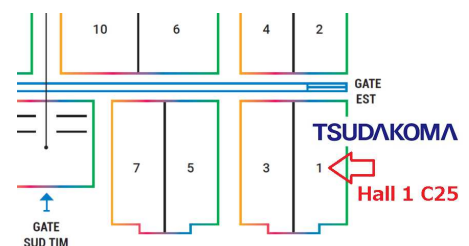

Please come and see our latest product lineup at **Hall 1 / C25**.

Information for EMO Milano 2021

Period: October 4th to 9st in 2021

Place: Fieramilano in Italy

Tsudakoma Booth: Hall 1 / C25

Tsudakoma Corp.

Main Exhibit Rotary Tables

IoT table for Industry 4.0

New ※Proto type

- ① Uptime monitoring is available on the cloud service.
Rotational speed and temperature can be monitored.
- ② The next maintenance time can be set for each usage condition.

DD & Ball Drive NC Tilting Rotary Table

RTT-131 New

- ① No-backlash, high transmission efficiency and high rigidity.
- ② Minimizes aging such as wear and maintains high accuracy for a long time.
- ③ Indexing speed is 2 times faster than previous model.

5axis 2 spindle NC Rotary Table

TWM-160,PS

- ① Mass-production processing for regular machining center.
- ② Exhibition linked with robots equipped with automation jigs.
