

Pallet Clamp

An NC rotary table with a built-in pallet clamp is available. This type of rotary table enables fast and highly accurate positioning of workpieces at any angle. Attachment of an auto-coupler makes it possible to apply hydraulic or pneumatic pressure to the top surface of pallets. By combining with a pallet-changer, setup, transfer and exchange can be carried out automatically.

Mounting position

Please specify the following items:

1. Mounting position of the Air-hydraulic booster
2. Control voltage for the solenoid of the Air-hydraulic unit: 100VAC or 24VDC (This voltage depends on the machine to be attached)
